AIDS Pharmaceutical Assistance Annual Administrative Report (APA AAR)
formerly the AIDS Drug Assistance Program (ADAP) AAR

These FILE SPECIFICATIONS for the ADAP AAR reflect the 1997 OMB-approved changes to the data set.

Beginning with the collection of 1997 data, the ADAP AAR is called the AIDS Pharmaceutical Assistance (APA) AAR.   This name change reflects the broader reporting scope of the ADAP AAR which includes *all* Title I and Title II CARE Act grantees' AIDS pharmaceutical assistance, whether or not the grantees use Ryan White CARE Act funds for an ADAP.

All Ryan White CARE Act grantees funded under Titles I and II are requested to complete an APA AAR.   If the grantee does not **administer** an ADAP or other AIDS pharamceutical assistance program, the grantee indicates "no" for PDRUG01B, completes the "contact information" section of the APA and submits the AAR data to HRSA.   The use of the term **administer** distinguishes the grantee's involvement with the program from *only providing funding* (as in the case of a Title I grantee giving funds to the Title II state ADAP program), or *only operating* (as in the case of a agency operating an ADAP for a Title II grantee).

As a result of the change or reporting scope to *all* AIDS pharmaceutical assistance, not just the "State ADAP," the data element PDRUG01A (type of program) has been added to collect the information: does the data in this report describe the activities of an AIDS Drug Assistance Program (ADAP), or does the data in the report describe other AIDS pharmaceutical assistance?

HOW TO USE THE FOLLOWING TABLE

The following table shows the complete file specifications for the ADAP (now APA) AAR. Column 1 includes both existing variable names and new variable names. If a change has occurred to the data element as a result to the OMB- approved modifications, the "Change" column reflects that activity, specifically, if the data element was added, modified, or deleted. A technical note: "deleted" variables are only "discontinued" variables. This means previously collected data remains intact using the original variable names.

The first column shows the complete list of data elements in the APA_AAR.dbf, including new data elements. The second, third, and fourth columns show the data element prior to the OMB-approved modifications. (The columns beside the new variable names are blank.) The "Change" column indicates the activity for the data element: addition, deletion or modification. Since this activity may be limited to the "type", "name", or "code" for a data element, three narrow columns under the "Change" column indicate which activity is occuring if the entire data element is not impacted by the change. The fifith, sixth, and seventh column indicate the change to a data element. In the case of a new data element, all three columns (the fifth, sixth,and seventh) are filled in.
